Instructions: The exam is 3 hours long and contains 6 questions. Write your answers clearly in the notebook provided. You may quote any result/theorem seen in the lectures without proving it. **Justify all your answers.**

Q1 Let $G$ be the graph pictured on Figure 1.
   a) Is $G$ planar?
   b) Is $G$ perfect?
   c) Find $\chi(G)$.
   d) Find $\chi'(G)$.

Q2 Let $G$ be the graph with weights $w : E(G) \to \mathbb{Z}_+$ pictured on Figure 2.
   a) Find the min-cost spanning tree in $G$.
   b) Find a shortest path spanning tree for the vertex $S$.

Q3 Let $G$ be the digraph pictured on Figure 3 with the capacity $c(e)$ indicated for every edge $e \in E(G)$. Find the $c$-admissible $(S, T)$-flow in $G$ of maximum total value.

Q4 Let $G$ be a connected loopless graph with $|E(G)|$ even. Show that the line graph $L(G)$ of $G$ has a perfect matching.

Q5 Let $H$ be the loopless graph with $|V(H)| = 2$ and $|E(H)| = 3$. (That is, $H$ consists of two vertices joined by three parallel edges.) Let $G$ be a loopless graph with $\deg(v) \geq 4$ for all $v \in V(G)$. Show that $G$ contains $H$ as a minor.

Q6 Let $G$ be a simple chordal graph with $|V(G)| \geq 10$ and $\omega(G) \leq 10$. Show that
   \[ |E(G)| \leq 9|V(G)| - 45. \]
